Designing

new designs; focus of our design professionals is a plethora of original, creative and unique artwork. This is the hub of wild colors and innovative forms.

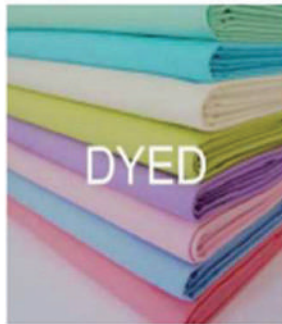

To approach customer requirements and aesthetic preference, our designers stay in touch with global trends and as a result, our designs depict a blend of contemporary and traditional patterns.

Fabric

We produce the highest quality fabric. Our fabric producing process is detailed and on average, takes up to 3-4 weeks. We start off by harvesting the raw materials, which is done through the process of spinning. Our dedicated labors carry out the spinning process by hands, which is why this process lasts up to several days.

After spinning, comes the process where the spun fibers which are wrapped around a cylindrical bobbin, forming a yarn. It is these yarns that are processed and made into the actual fabric.

When these yarns have been collected on bobbins, they are pushed through the next step known as weaving. Weaving is carried out by a computerized machine called loom, which joins several threads together and forms it into a fabric.

Through our efficient processes, we ensure that we provide you with high quality GSM's including thread counts as per requirement.
